Subject Index: Volume 33, 2000

Acceleration spectrum analysis
diagnostic reproducibility of, 99
Action potential
intracellular calcium elevation and, 361
monophasic, in D0870-induced torsades de pointes, 181
Activation
estimation from ECG measurements, 171
with inappropriate sinus tachycardia, 381
sequence variations caused by IV block, 311
Activation-recovery interval
calculation from RMS waveform, 171
Acute coronary syndromes
with recurrent ischemia, eptifibatide effect on, 127
African population
electrocardiographic findings, 1
Age
interpretation of ECG tracing and, 1
left ventricular hypertrophy and, 205
magnitude of ventricular depolarization vector and, 31
Angina pectoris
ECG interpretations, replication of results for, 341
recurrent ischemia in, eptifibatide effect on, 127
Anterior myocardial infarction
antecedent, with true posterior myocardial infarction, 189
simulated by RBBB-Q wave interaction, 387
Antifungal agent
induction of sudden death, catecholamines and, 181
Arrhythmias. *See also specific arrythmias*
diagnostic reproducibility of several SAECG techniques, 99
Arrhythmogenicity
cellular/ionic mechanisms of, 299
Atrial sensing performance
of single-lead VDD pacing during physical activity, 253
Atrial synchronous ventricular pacing
during physical activity, 253
Atrioventricular node reentry
spontaneous premature atrial contractions and, 287
Atrioventricular pathway
accessory, after radiofrequency ablation for WPW, 71
Autonomic tone
f-QRS duration from signal averaged ECG and, 17
QT interval duration and, 321
Autoregressive modeling
of circadian heart rate variability, 147

Beta-blockers
spectral analysis of circadian heart rate variability and, 147
Black population
electrocardiographic findings, 1
left ventricular mass in, 205
Body position
effect on QRS- and ST- segment monitoring, 23
Body size differences
left ventricular hypertrophy and, 205
Bradycardia-dependent block
associated with respiration, 375
Brugada syndrome
differential diagnosis, 299
Bupivacaine
myocardial depression and pulmonary edema induction, 291

Calcium channel blockade
reentrant tachycardia dynamics and, 349
Calcium current, L-type
intracellular calcium elevation and, 361
Cardiac rupture
risk assessment, electrocardiography for, 49
Cardiogenic pulmonary edema
bupivacaine-induced with myocardial depression, 291
Catecholamines
DO870-induced sudden death and, 181
Children
with mitral valve prolapse, heart rate variability in, 219
Chloride currents
repolarization acceleration induced by intracellular calcium and, 361
Circadian patterns
of heart rate variability, spectral analysis of, 147
Complex geometry
of cardiac conduction, computer model for, 241
Computer model
of cardiac conduction in 3-D complex geometries, 241
replication of Minnesota ECG coding results, 341
of torsade de pointes mechanism, 55
of T-wave alternans caused by IV block, 311
Conduction. *See also specific cardiac conduction disorders*
computer model, 241
defects, in torsade de pointes, 55

intermittent defects simulating anterior myocardial infarction, 387
reduction, bupivacaine-induced, 291
in reentrant tachycardia, 349
SA junction, increased vagal tone during expiration and, 375
spontaneous premature atrial contractions and, 287
Contractility
reduction, bupivacaine-induced, 291
Coronary angioplasty
prolonged, time course changes in ECG during, 37
Coronary artery disease
beat-to-beat QT interval variability in, 119
Coupling intervals
graphic analysis of, 137
Cycle length prolongation
in reentrant tachycardia, 349

D0870
induction of sudden death, catecholamines and, 181
Death
from recurrent ischemia, eptifibatide effects on, 127
Decremental conduction
after radiofrequency ablation for WPW, 71
Deductive electrocardiography
for true posterior myocardial infarction diagnosis, 189
Defibrillation threshold
upper limit of vulnerability and, 279
Dipole moment
of maximum QRS, age and, 31
Disopyramide
attenuation of repolarization alternans, 269
Disparate recovery
in torsade de pointes, 55
Dogs
direct epicardial repolarization dispersion assessment, 171
DO870-induced sudden death, catecholamines and, 181
rapidly paced upper limit of vulnerability in, 279
reentrant tachycardia, conduction changes in, 349

Early repolarization syndrome
clinical characteristics and mechanisms for, 299
Echocardiogram
confirmation of true posterior myocardial infarction, 189
Electrical cancellation
affecting QRS complexes, 189
Electrocardiogram. *See also* **Signal-averaged electrocardiogram**
ambulatory, heart rate variability in, 147
for cardiac rupture risk assessment, 49
coding result comparisons, 341
computer-assisted continuous multi-lead for ischemia-monitoring, 127
incomplete expression of true posterior MI, 189
in ischemia diagnosis, automated QT dispersion and ST-segment measurements for, 329
long-term monitoring, with graphic analysis of coupling intervals, 137
of middle-age Africans, 1
QT dispersion, effects of autonomic tests on, 321
racial differences in left ventricular mass, 205
of rapid ventricular repolarization, 159
time course changes in induced myocardial ischemia, 37
Endocardium
repolarization alternans, nicorandil attenuation of, 269
Epicardium
direct assessment of repolarization dispersion, 171
repolarization alternans, nicorandil attenuation of, 269
Epidemiology
ECG coding systems, reproducibility of, 341
ECG usage in, 1
Epinephrine
DO870-induced sudden death and, 181
Eptifibatide
incidence/severity of recurrent ischemia and, 127
Escape-capture bigeminy
sinoatrial block and, 375
Ethnicity
interpretation of ECG and, 1
Exercise
f-QRS duration and, 17
lack of association of T-wave alternans and ST segment depression in, 261

Fast Fourier Transform spectral analysis
of circadian heart rate variability, 147
Filtered-QRS duration
exercise effects on, 17
Filtering
bidirectional and spectral for signal-averaged ECG analysis, 233
Finite Volume Method
in cardiac conduction computer model, 241
Focal abnormal automaticity
prediction of radiofrequency ablation efficacy, 381
Frequency-domain analyses
of analysis of signal-averaged electrocardiogram, 99
diagnostic reproducibility of, 99

Gender
interpretation of ECG and, 1
left ventricular hypertrophy and, 205
Guinea pig
nicorandil attenuation of repolarization alternans in, 269

Heart rate variability
in children with mitral valve prolapse, 219
in 24-hour Holter recordings, 147
Heart transplantation
surgical technique influence on sinus function, 65
High-resolution signal averaged electrocardiography
normal limits in Japanese adults, 225

Idiopathic left ventricular hypertrophy
reentrant circuit in, 195
Idiopathic left ventricular tachycardia
cycle length alteration, after radiofrequency ablation, 79
Inappropriate sinus tachycardia
cured by selective radiofrequency catheter ablation, 381
Inferior myocardial infarction
incomplete ECG expression of, 189
Intermittent conduction defects
simulating anterior myocardial infarction, 387
Intraventricular block
T-wave alternans and, 311
Ischemia
ambulatory exercised-induced, 261
diagnosis, automated QT dispersion and ST-segment measurements for, 329
monitoring, computer-assisted continuous multi-lead ECG for, 127
vectorcardiography monitoring during, 23
Ischemic Changes Sensor
ECG evolution during occlusion and, 37
Isoproterenol
DO870-induced sudden death and, 181

Japanese adults
high-resolution signal averaged ECG parameters, 225

Late potential analysis
reproducibility of, 107
Left bundle branch block
with right axis deviation, 199
Left septal fascicle
intermittent conduction defects simulating anterior MI, 387
Left ventricular mass
racial differences in, 205

Magnetocardiogram
ventricular depolarization vector, age-related changes in, 31
Marquette Matrix-12 system
replication of Minnesota ECG coding results, 341
Mitral valve prolapse
in children, heart rate variability with, 219
Monitoring
body position changes and, 23
of ischemia, computer-assisted continuous multi-lead ECG for, 127
long-term ECG with graphic analysis of coupling intervals, 137
Myocardial depression
bupivacaine-induced with pulmonary edema, 291
Myocardial hypertrophy
intracellular calcium elevation effects, 361
Myocardial infarction
assessment of cardiac rupture risk after, 49
automated QT dispersion and ST-segment measurements in, 329
diagnostic reproducibility of several SAECG techniques, 99
ECG interpretations, replication of results for, 341
healed, intracellular calcium elevation effects, 361
incomplete ECG expression of, 189
recurrent ischemia in, eptifibatide effects on, 127
simulated by RBBB-Q wave interaction, 387
Myocardial ischemia
vectorcardiography monitoring during, 23

Nicorandil
attenuation of repolarization alternans, 269
Normal time
for Hi-Res ECG in Japanese adults, 225

Parasystole
graphic analysis of, 137
Platelet glycoprotein IIb/IIIa inhibitors
incidence/severity of recurrent ischemia and, 127
Postmyocardial infarction
signal-averaged ECG, filter-specific criteria for, 233
Potassium currents
in rapid ventricular repolarization, 159
Premature atrial contractions
in arrhythmia diagnosis, 287
Purkinje potential
in reentrant circuit of ILVT, 195

QRS alternans
absence in T-wave alternans, intraventricular block and, 311
QRS complex
age-related changes in, 31
alteration after radiofrequency ablation, 79
body position effect on, 23
electrical cancellation of, 189
peak rotation, in torsade de pointes, 55
QT dispersion
automated measurement, added diagnostic value of, 329
effects of autonomic function tests on, 321
vs. RMS curve estimates of reperfusion dispersion, 171
QT interval variability
in coronary artery disease, 119
Q waves
RBBB-induced, simulating anterior myocardial infarction extension, 387

Racial differences
in left ventricular mass, 205
Radiofrequency catheter ablation
anterograde decremental conduction after, 71
for idiopathic left ventricular hypertrophy, 195
for inappropriate sinus tachycardia, 381
QRS complex alterations after, 79
Recovery
estimation from ECG measurements, 171

Reentry
dynamics and conduction changes in, 349
in idiopathic left ventricular hypertrophy, 195
spontaneous premature atrial contractions and, 287
in torsades de pointes mechanism, 55
Replication
of Minnesota ECG coding results by Marquette Matrix-12 system, 341
Repolarization, ventricular
early, cellular/ionic mechanisms of, 299
in rodents, 159
Repolarization alternans
nicorandil attenuation of, 269
Repolarization dispersion
estimates from ECG measurements, 171
Repolarization indexes
ECG evolution during occlusion and, 37
Reproducibility
of alternate-domain techniques in SAECGs, 99
of spectral turbulence and late potential analysis, 107
Respiration
bradycardia-dependent sinoatrial block and, 375
Right axis deviation
with left bundle branch block, 199
Right bundle branch block-induced Q waves
simulating anterior myocardial infarction extension, 387
Rodents
chronically infarcted, intracellular calcium elevation in, 361
rapid ventricular repolarization in, 159
Root mean square curve
in estimating repolarization dispersion, 171

Sensitivity
of ECG-based indexes in myocardial ischemia, 37
Sex
interpretation of ECG and, 1
Signal-averaged electrocardiogram
bidirectional and spectral filter effects on, 233
f-QRS, autonomic tone influence on, 17
frequency-domain analysis reproducibility, 99
high-resolution, normal limits in Japanese adults, 225
time-domain late potential analysis reproducibility, 99, 107
Single-lead VDD pacing
during physical activity, 253
Sinoatrial block
bradycardia-dependent associated with respiration, 375
Sinoatrial conduction time
spontaneous premature atrial contractions and, 287
Sinus bigeminy
differential diagnosis, 85
Sinus dysfunction
influence of surgical technique on, 65
Sinus escape-capture bigeminy
differential diagnosis, 85
Sinus extrasystoles
differential diagnosis, 85
Sodium channel blockade
by bupivacaine, 291
reentrant tachycardia dynamics and, 349
SPECT myocardial perfusion scintigraphy
confirmation of true posterior myocardial infarction, 189
Spectral temporal mapping
diagnostic reproducibility of, 99
Spectral turbulence analysis
diagnostic reproducibility of, 99
short-term and long-term diagnostic reproducibility of, 107
ST segment
automated measurement of deviations, added diagnostic value of, 329
body position effect on, 23
depression, during exercise-induced ambulatory ischemia, 261
elevation, early repolarization syndrome and, 299
Sudden death
D0870-induced, catecholamines and, 181
Supraventricular tachycardia
spontaneous premature atrial contractions and, 287
Surgical technique
sinus dysfunction development and, 65
Sympathetic activity
in ECG recordings, heart rate variability and, 147

Tachycardia
cured by selective radiofrequency catheter ablation, 381
cycle length alteration, after radiofrequency ablation, 79
spontaneous premature atrial contractions and, 287
Three-dimensional representation
in computer model of cardiac conduction, 241
Thrombolytic therapy
RBBB-Q wave interaction simulating anterior MI and, 387
Time-domain analysis
diagnostic reproducibility of, 99, 107
Torsade de pointes
conduction defects and QRS rotation in, 55
D0870-induced, catecholamines and, 181
True posterior myocardial infarction
incomplete ECG expression of, 189
T-wave alternans
during exercise-induced ambulatory ischemia, 261
mechanisms caused by intraventricular block, 311

Unstable angina
recurrent ischemia in, eptifibatide effect on, 127
Upper limit of vulnerability
rapid pacing and, 279

Vagal tone
increased during expiration, SA junction conductivity and, 375

Vasculitis
left bundle branch block with right axis deviation in, 199
Vectorcardiography
during myocardial infarction, 23
Ventricular arrhythmias
diagnostic reproducibility of several SAECG techniques, 99
Ventricular ectopic beats
graphic analysis of, 137
Ventricular fibrillation
upper limit of vulnerability, rapid pacing and, 279
Ventricular hypertrophy
idiopathic, reentrant circuit in, 195
Ventricular late potential
signal-averaged ECG, filter-specific criteria for, 233
Ventricular tachycardia
cycle length alteration, after radiofrequency ablation, 79
sodium and calcium channel involvement in, 349

Wegener's granulomatosis
left bundle branch block with right axis deviation in, 199
Wolff-Parkinson-White syndrome
anterograde decremental conduction after radiofrequency ablation, 71
